3. RISK-BASED APPROACH

3.1 Risk Based Approach in Client Verification

The Company applies appropriate measures and procedures, on a risk-based approach, so as to focus its effort in those areas where the risk of money laundering and terrorist financing appears to be higher. A risk-based approach is adopted by the Company during the verification of the Clients' identity, the collection of information for the construction of their economic profile and monitoring of their transactions and activities at their Trading Accounts. Taking into consideration the assessed risk, the Company determines the type and extent of measures it adopts, to manage and mitigate the identified risks.

The Company identifies the Clients prior or during to commencing a business relationship.

The Company, in accordance with the Law, conducts the verification of the identity of the Clients and the beneficial owners (if the Client is a body corporate) during the establishment of the business relationship.
